## SATELLITE EVENT

### CELLS, CIRCUITS AND COMPUTATION: EXPANDING THE HORIZONS OF BIG DATA ANALYSIS

July 1, 2016  
DGI-byen  
Copenhagen, Denmark

In this one day workshop immediately before FENS 2016, Allen Institute for Brain Science and Human Brain Project scientists will present brand new research discoveries and data analysis tools that have been developed from the mining and analysis of data that is publicly available online. Each presentation will also incorporate hands-on training of novel and emerging data analysis tools in effectively using the publicly available resources from both projects.

**Space is limited and registration is required.**

Please go to [education.humanbrainproject.eu/web/hbp-education-portal/fens-2016](http://education.humanbrainproject.eu/web/hbp-education-portal/fens-2016) for more information.

### CONTRIBUTORS

This event is jointly sponsored by the Allen Institute for Brain Science and the Human Brain Project Education Programme
