

## **Call for Nominations – Mathematical Neuroscience Prize**

Israel Brain Technologies (IBT) is currently accepting nominations for the Mathematical Neuroscience Prize. Researchers are encouraged to nominate potential candidates in the field of theoretical mathematics in neuroscience for a \$100,000 prize.

### **Program Description**

Theoretical methods are essential for integrating genetic, molecular, anatomical, and physiological information acquired over a large range of spatial and temporal scales into a unified concept of brain function.

The Mathematical Neuroscience Prize honors researchers who have significantly advanced our understanding of the neural mechanisms of perception, behavior and thought through the application of mathematical analysis and modeling.

### **Rules and Eligibility**

- Winners will be selected by a Selection Committee consisting of previous prize winners.
- Candidates must be currently active in research and have made outstanding contributions to mathematical neuroscience. No restrictions are placed on a candidate's age, citizenship or country of residence.
- Up to two prizes of \$100,000 will be awarded each year. A single prize can be split between recipients who have contributed to the same accomplishment.
- The right to nominate a candidate is open to everyone, and self-nomination is allowed. No consent of a nominee is required.
- Nominations must include a CV with publication list, a list of the 5 most important publications, and a 1-page statement of research achievements.
- Nominations must be submitted by January 15, 2019 to [office@page3co.il](mailto:office@page3co.il)
- The winner will be selected by January 31 2019, and the prize awarded in March 2019.
