

Industrial PhD positions at UCA Datalab

The University of Cádiz and UCA Datalab seek to incorporate mathematicians, physicists and engineers to develop research programs in collaboration with Airbus D&S and Navantia.

We offer a stimulating environment, professional and academic career development and 4-year PhD contracts in the following topics:

- Data Science and Machine Learning in Industrial Applications
- Resilient security solutions in ad hoc networks
- Design of intelligent systems based on domain-knowledge information
- Distributed multilevel architectures for IoT ecosystems
- Dimensional control of large structures using artificial vision techniques

Further details available at: <http://datalab.uca.es/opportunities/>
Interested candidates are encouraged to send their CV and motivation letter to datalab@uca.es

Deadline: **Dec 26, 2018**
