**IbPRIA** is an international event co-organized every two years, by the Spanish and Portuguese Associations for Pattern Recognition. IbPRIA is a single track conference consisting of high quality, previously unpublished papers, presented either orally or as a poster, intended to act as a **forum for research groups, engineers and practitioners to present recent results, algorithmic improvements and promising future directions in pattern recognition and image analysis.**

### Topics

- Computer Vision
- Multimedia Systems
- Pattern Recognition
- Machine Learning
- Data Mining
- Bioinformatics
- Image Processing
- Shape and Texture Analysis
- Information Systems
- Biometric Technologies
- Speech and Audio
- Document Processing
- Character and Text Recognition
- Robotics
- Remote Sensing
- Industrial Applications of Pattern Recognition
- Hardware Architectures
- Autonomous Driving
- Computational Biology
- Medical and forensic applications of Pattern Recognition

### Keynote Speakers

**Robert Fisher**

*University of Edinburgh*

**Isabel Trancoso**

*IST, University of Lisbon*

**Battista Bigio**

*University of Cagliari*

### Tutorials

May 3, 2022 (afternoon)
